

A Compounds per structure source

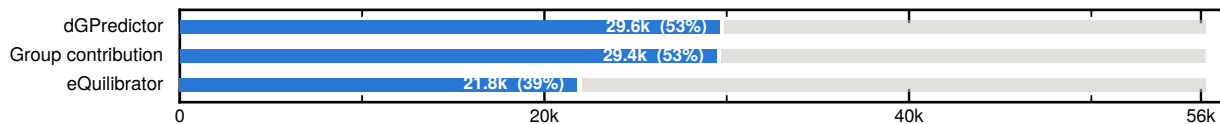

B Structures reaching ModelSEED compounds

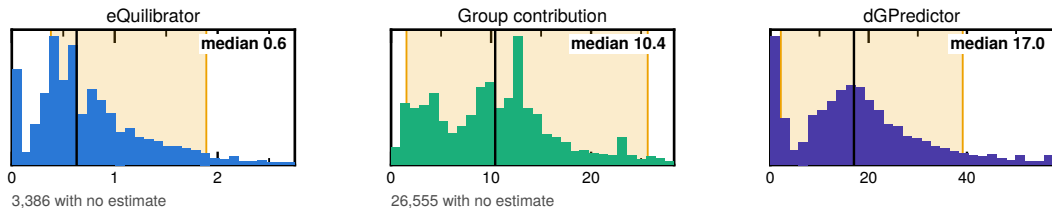

A Protonation source

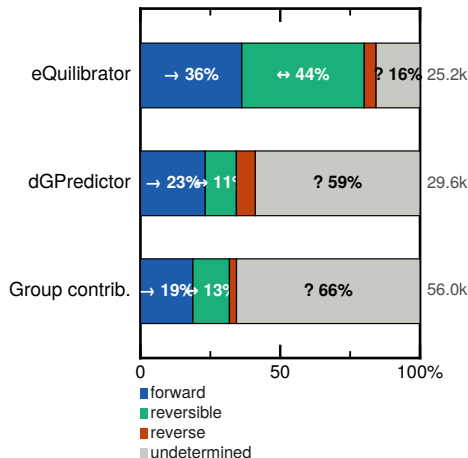

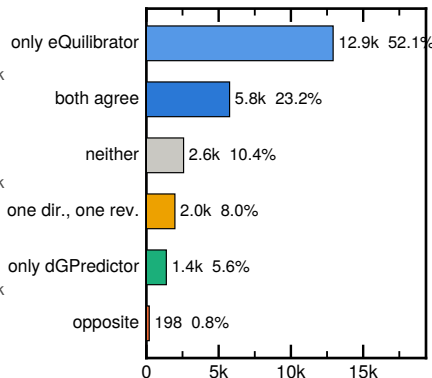

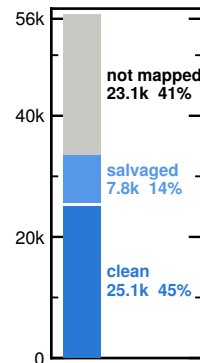

B Reactions with a real energy, of 56,012 (sentinels excluded)

C Reported uncertainty (kcal/mol), separate axes

shaded band: p5-p95 of the reactions this source grades silver

A Direction by source**B** eQuilibrator vs dGPredictor**C** Atom mapping**D** What underpins each evidence grade
